

ECHOSCAPE NRC TESTING RESULTS
MATERIAL THICKNESS - 9mm
NRC 0.85

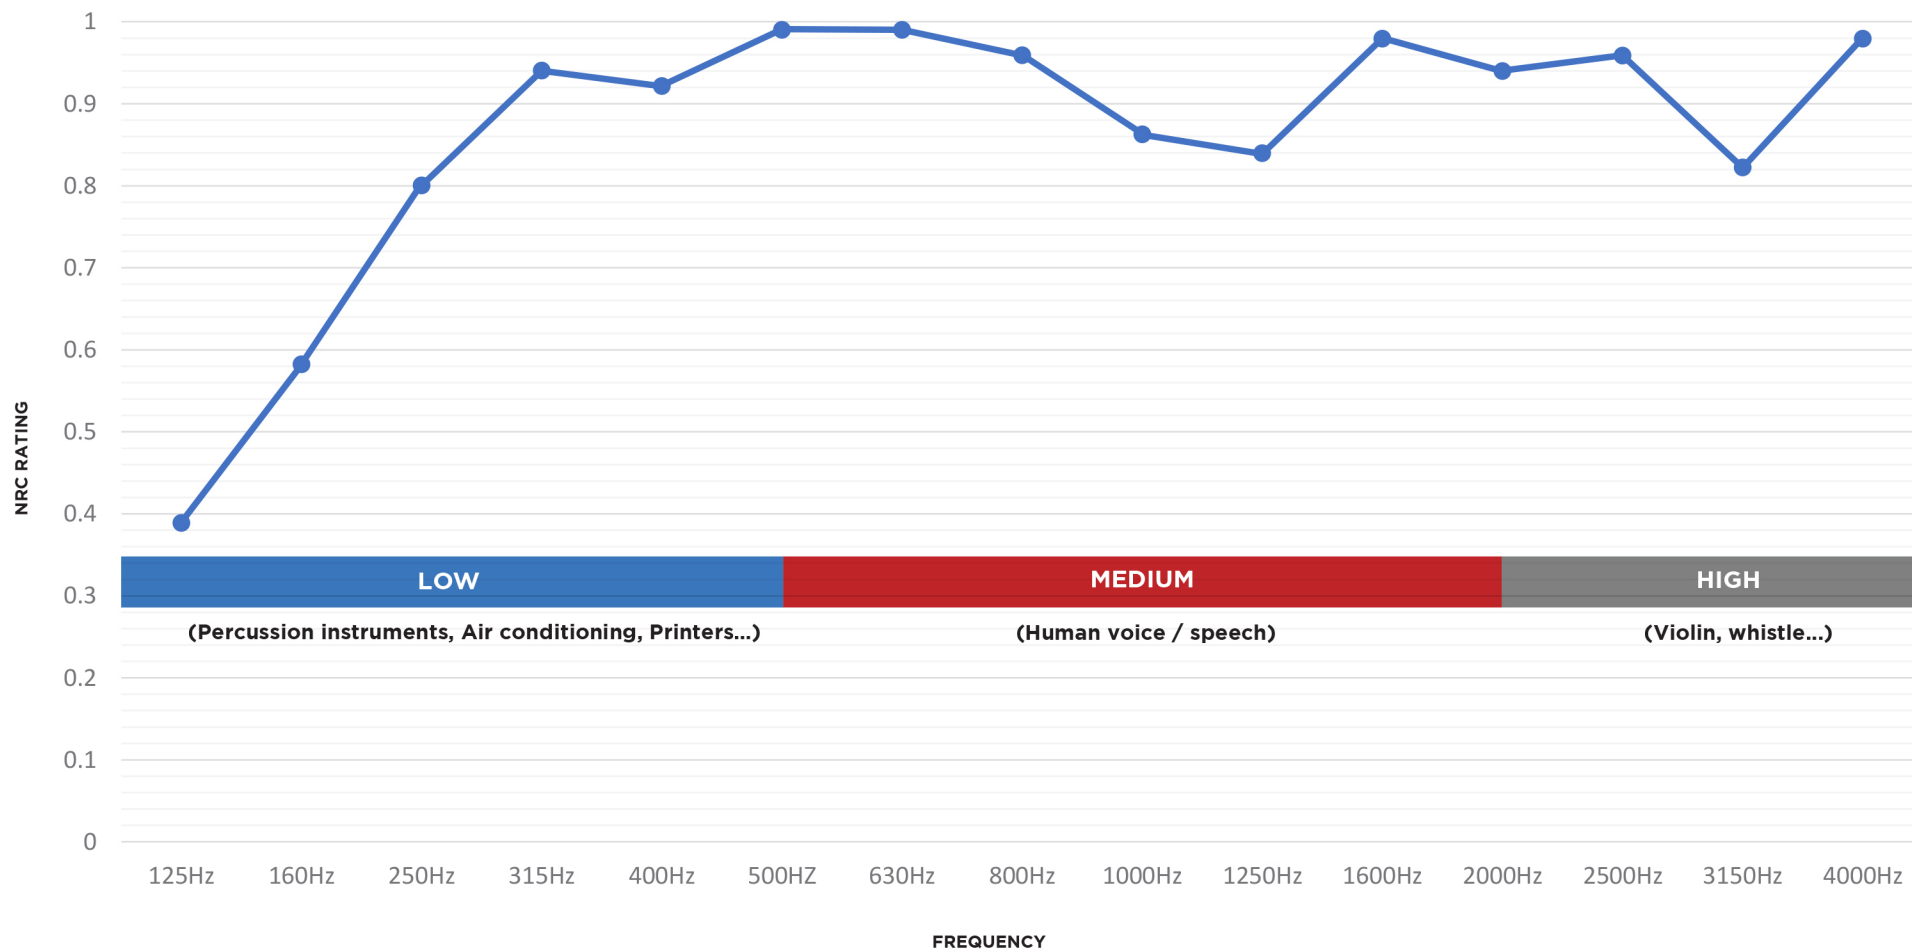

(Average sound-absorbing coefficient frequency 125 to 4000 Hz)

Hz = unit of measurement that indicates frequency - i.e. the number of times something occurs per time interval.

ECHOSCAPE NRC TESTING RESULTS
MATERIAL THICKNESS - 18mm
NRC 0.9

(Average sound-absorbing coefficient frequency 125 to 4000 Hz)

Hz = unit of measurement that indicates frequency - i.e. the number of times something occurs per time interval.
