

Where Quiet, Comfort and Care Come Together

Create healing-focused environments that balance acoustic control, privacy, and flexibility. MergeWorks solutions, include wall panels, ceiling treatments, and room dividers, all designed to support patient comfort, staff focus, and hygienic performance.

Ideal for hospitals, clinics, and care centers, these easy-to-install products help reduce noise and distractions while enhancing the visual calm of your space.

Acoustic Wellness

Minimize disruptive noise with acoustic baffles and clouds that absorb sound and support a more restful, focused environment for both patients and staff. Ceilings are an ideal location for acoustic treatments, especially in large or open areas, helping reduce the echo and improve overall sound clarity.

Our Acoustic Materials Offer:

Material Thickness: 3/8" (9mm) & 3/4" (18mm)

NRC Rated
0.85 & 0.9

ASTM E84
Class A

VOC
Free
